Subject: Meeting with Chemours
Attachments: Chemours proposed agenda for meeting with EPA.docx

Gentlemen,

Chemours requested a meeting with EPA to present their current efforts at both their Fayetteville, NC and their Washington Works plant in WV. Attached is a draft agenda. We are extending an invitation to the states to attend or call into this meeting.

Right now, tentative dates are either February 7th or 8th and the location will likely be in Washington, D.C. EPA is working on setting up video conference tie-in to this meeting, but you or your staffs would be welcome to attend in person. At the moment, we are planning on sending staff to the meeting from Philadelphia.

Please let me know your interest in attending, connecting via VTC or via teleconference. Also, if you can give me an idea of who will be attending or calling in, that would be appreciated.

Thanks,

Rick

Rick Rogers, Associate Director
Office of Drinking Water and Source Water Protection
